

I would like to ask the FCC to support the NJ Do-Not-Call list and the state laws that support it. My phone used to ring at all hours of the day prior to getting on the Do-Not-Call list. I work long hours and have only a few hours to share with my family. I do not need nor want unsolicited phone calls during dinner, during story time with my daughters, or during quiet time with my wife. Please do not change the law. Embrace it and encourage other states to make their laws similar to NJ's. It has been a success!! I get less than one call from marketers a month. Life is now good. Please do not change that.
